

Thinking Through the Noise: A Socratic Dialogue on Information Integrity

Invitation: Explore Critical Thinking, Media literacy & the Future of Ethical AI

Date and Time: 20th of November 2025, 15:00

Location: Europa Experience - David Sassoli, Piazza Venezia, 6 - Roma

Join the Dialogue

You are warmly invited to **Thinking Through the Noise: A Socratic Dialogue on Information Integrity**, an open session bringing together professors, students, educators, innovators, designers, and citizens to explore how critical thinking, media literacy, and artificial intelligence can help us navigate the growing complexity of the information space.

Through live demonstrations, creative showcases, and open discussion, participants will examine how technology can support, not replace, human reasoning, and how AI can become a partner in reflection rather than a source of noise.

The dialogue draws on insights from **TITAN**, an EU-funded project that has developed an AI-based Citizen Coaching Ecosystem to foster critical thinking through personalized Socratic dialogue. Over three years, TITAN has combined ethics, design, and AI to help people think more clearly, question more deeply, and engage more responsibly online.

A highlight of the event is the award presentation for **Critically Yours**, TITAN's international design challenge endorsed by *Sapienza University of Rome* and the *Cumulus Association*. The competition invited students, graduates, and creative teams from around the world to design interactive experiences and short videos that make media literacy and critical thinking accessible to all. The winning projects will be presented live during the session.

What You'll Experience:

- **Critical Thinking as a Digital Skill:**
Discover how structured reflection and questioning can strengthen discernment through TITAN's coaching framework.
- **Socratic Method Meets Generative AI:**
Experience a live demonstration of an AI dialogue that applies the Socratic method to explore credibility, bias, and reasoning in digital content
- **Award Ceremony and Networking:**
Celebrate the winning ideas and short films created by emerging designers from around the world for building media literacy and critical thinking.

- **Media Literacy for All:**
Discover how TITAN tailors learning experiences to different ways of thinking and self-regulation, helping users recognize, question, and understand common disinformation tactics.
- **Policy & the Road Ahead:**
Engage with researchers, policymakers, and civil society experts on how AI-supported critical thinking can inform future strategies against disinformation and strengthen democratic resilience.

Whether you're a media educator, policymaker, civic innovator, or simply a curious citizen, this event aims to spark reflection, inspire collaboration, and offer practical ways to foster more thoughtful engagement in our shared information space.

Let this be a beginning – of new questions, ideas and connections!

Event agenda:

Time	Session Title	Description
15:00 15:10	Welcome & Opening Remarks	Introduction by UNINETTUNO Rector, Prof. Maria Amata Garito, and TITAN Project Coordinator
15:10 15:30	The TITAN Vision & Key Results	Overview of project methodology and technological innovations. Massimo Magaldi, TITAN Coordinator and Technical Manager at Engineering Ingegneria Informatica
15:30 15:50	Live Demonstration: The AI Socratic Coach	Walkthrough of critical thinking dialogues and user experience. George Petatis, Senior Researcher at NCSR "Demokritos"
15:50 16:10	Design Against Disinformation	Prof. Lorenzo Imbesi, President, Cumulus Association
16:10 16:30	TITAN Challenges introduction	TITAN Team and EU officials present the TITAN Challenge vision and evolution
16:30 17:30	TITAN Challenges winning prototypes living presentation	Four Challenge winners present their achievements, prototypes or videos
17:30 18:30	Award ceremonies and networking cocktail	Recognition of winners followed by a light reception and informal networking
